

# GRAIN SILOS HOPPER

# KONSIL HOPPER GRAIN SILO

## WORKING PLATFORM

allows to conveniently operate the grain transport equipment

## PLATFORM

ensures convenient access to the inspection hole and roof stairs

## UPPER INSPECTION HOLE

allows to inspect grain in the silo

## EXTERNAL LADDER

with safety cover and protection door against unauthorized access

## LOWER MAINTENANCE HOLE

provides access to the silo for maintenance purposes

## SUPPORTING STRUCTURE

hot galvanized

## UNLOADING PIPE WITH A DAMPER

allows to install unloading equipment and regulate the silo unloading capacity

## CENTRAL LOADING INLET

allows to install loading equipment

## ROOF STAIRS

allow convenient access to the working platform or the peak platform

## ROOF VENTS

allow adequate ventilation of the grain

## EXHAUST FAN

prevents condensation of steam on the silo's roof

## EMERGENCY DUCT

allows to unload the silo when the unloading pipe gets clogged or the damper fails

## VENTING DUCTS

allow the flow of air from the fan through the grain stored in the silo

## FAN

adjusted to the size of the silo, it ensures the inflow of air to ventilate the grain

The equipment is different in different silo models.

## SILO ADVANTAGES

conical hopper with 45° inclination

frequent, fast and complete unloading of grain

the supporting structure is made of braced poles and a supporting ring

## FUNCTIONALITY

storage of grains, maize and seeds of oil plants

cooling down and ventilating the stored grain

devices that mechanize the loading and unloading of grain

## CONSTRUCTION

high quality galvanized metal sheet

roof with embossed areas that prevent water from getting inside the silo

structure made of galvanized high performance steel

\* commercial capacity of the silo has been calculated for the rated cubic capacity of the silo and material with density of 780kg/m³ (in the above table);

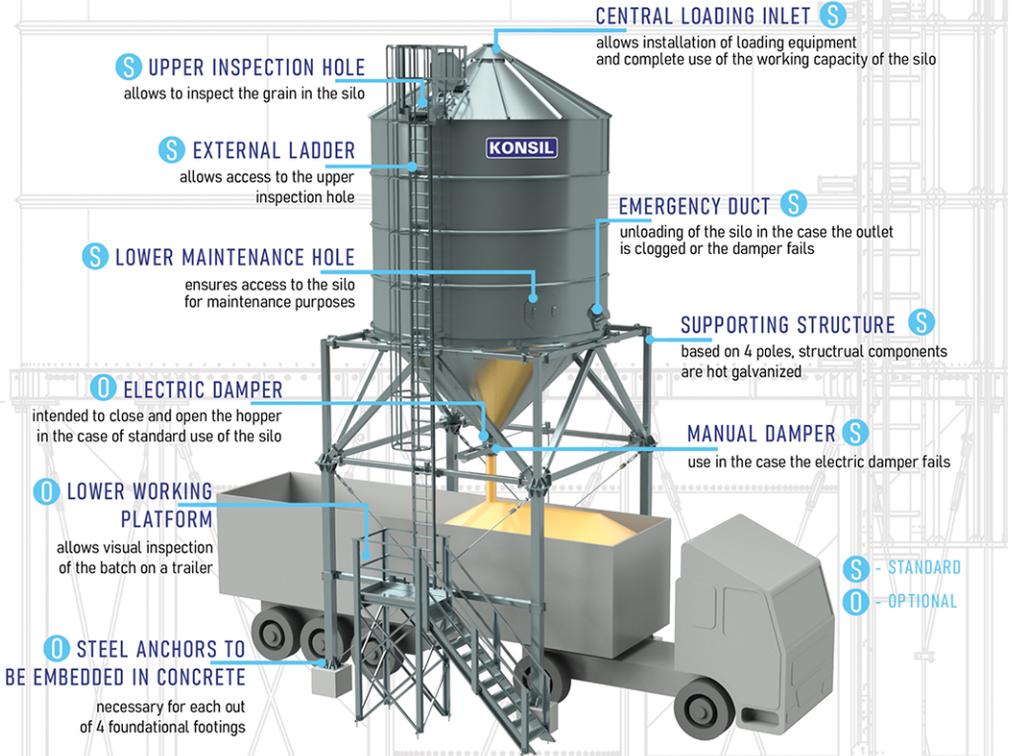

actual capacity may be different because it depends on numerous parameters, such as the type of stored grain, amount of impurities and moisture content

\*\* height measured from the foundation to the central loading inlet

\*\*\* net weight of the silo components

S - Standard, 0 - Optional
