

KONSIL

GRAIN SILOS HOPPER

KONSIL HOPPER GRAIN SILO

The equipment is different in different silo models.

SILO ADVANTAGES

conical hopper with 45° inclination

frequent, fast and complete unloading of grain

the supporting structure is made of braced poles and a supporting ring

FUNCTIONALITY

storage of grains, maize and seeds of oil plants

cooling down and ventilating the stored grain

devices that mechanize the loading and unloading of grain

CONSTRUCTION

high quality galvanized metal sheet

the roof is ribbed to prevent rain entering the silo

structure made of galvanized high performance steel

KONSIL HOPPER SILO MODELS STANDARD AND OPTIONAL EQUIPMENT

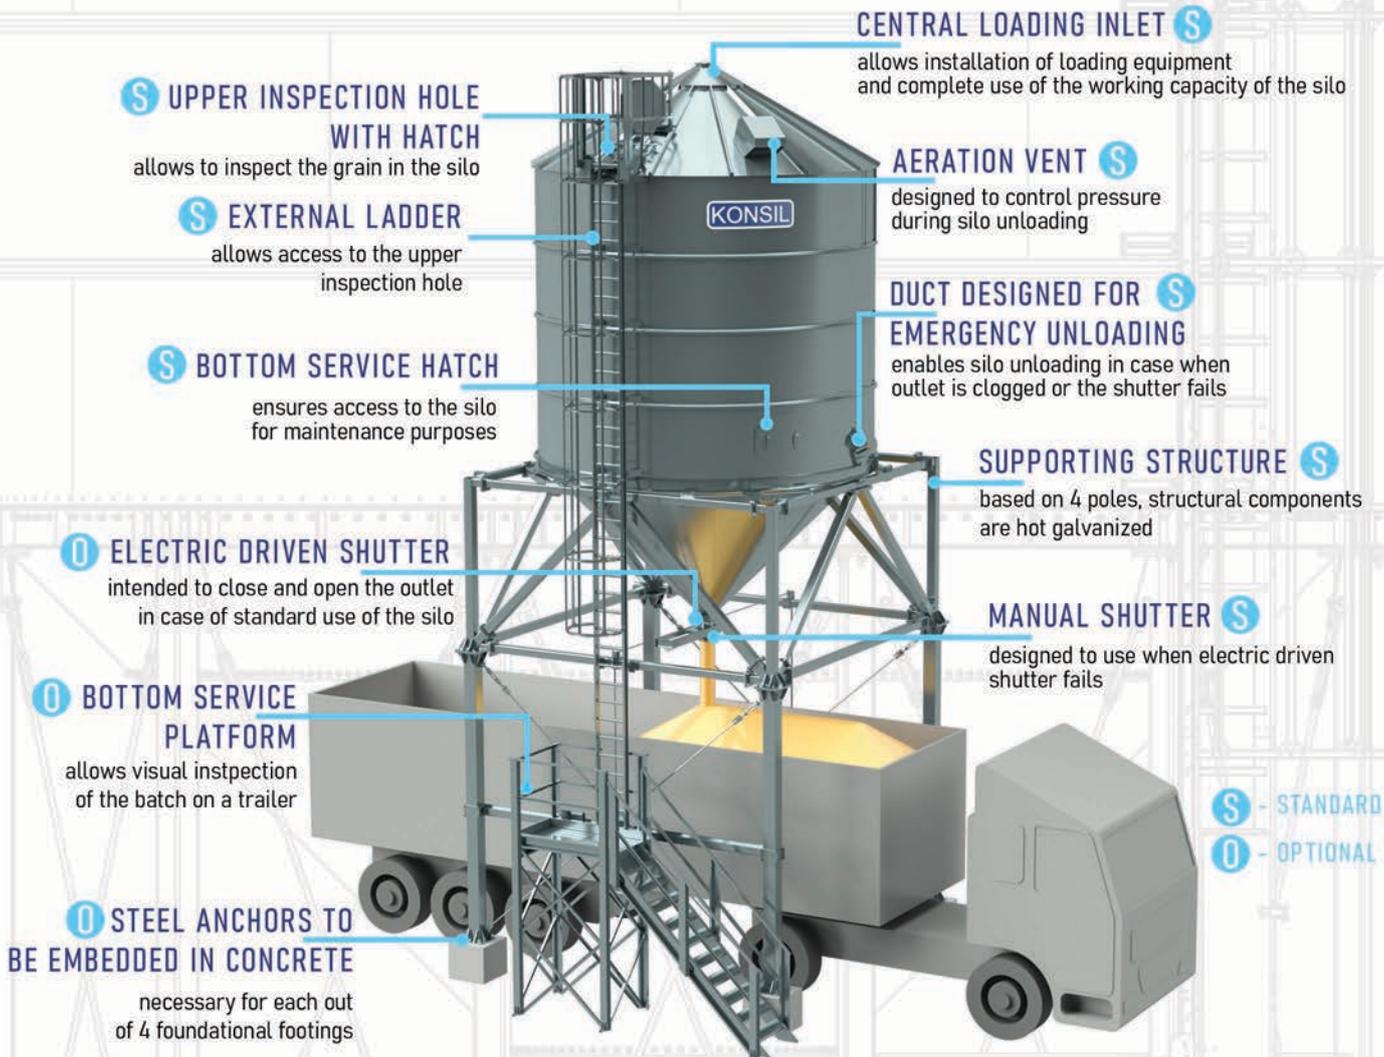

CAPACITY (t)*	44	53	61	70	49,5	61,2	72,7	84,2	95,8	107,3	92,8	109	126	143	159	234	260	285	312

* commercial load capacity of the silo has been calculated for the nominal cubature of the silo and material with density of 780kg/m³ (in the table mentioned above); actual capacity may be different because it depends on numerous parameters, such as the type of stored grain, amount of impurities and moisture content

** height measured from the surface of foundation to the central loading inlet

KONSIL DELIVERY SILO **NEW!**

MODELS:	CAPACITY*	VOLUME	HEIGHT**	DIAMETER	PASSAGE WIDTH	PASSAGE HEIGHT
KON-SPED 60/2	37,9 t	48,6 m ³	10,27 m	4,46 m	3,95 m	4,95 m
KON-SPED 60/4	61,2 t	78,4 m ³	12,17 m			

* commercial capacity of the silo has been calculated for the rated cubic capacity of the silo and material with density of 780kg/m³

** height with foundational footings
